

Siora Surgicals Pvt. Ltd. Added 5.0 mm Locking Large Fragment Implant & Instrument Set to its HELIX Locking Plate System

Available in titanium and stainless steel, this set will definitely be admired by orthopedic surgeons

Different types of bones are there in our body, some are small while some are large, and all perform different functions regarding their location in the body. All bones are prone to getting fractures due to one or another reason, and for the treatment, different types of methods are there. Serious fractures like displaced one or where multiple fragments are there require [orthopedic implants](#) for the stabilization of bones.

Depending upon the size of the bone and fracture pattern, different types of trauma implants are used. For serious long bone fractures, locking large fragment implants are required during surgery. They are specifically designed to fix fractures occurring in Humerus, Femur, and Tibia. Besides this, large locking fragment implants are also required for the surgical fixation of peri-prosthetic fractures, non-unions or malunions, and osteopenic bone.

Siora Surgicals Pvt. Ltd. has added 5.0 mm locking large fragment implant & instrument set to HELIX Locking Plate System category. Some of the implants & instruments present under this category include:

- ✓ 5.0 mm Locking head screw self-tapping
- ✓ 5.0 mm Locking head cancellous screw full thread self-tapping
- ✓ Cortical screw 4.5 mm Dia. self-tapping
- ✓ 5.0 mm Locking head cancellous screw 16 mm thread self-tapping
- ✓ LCP drill sleeve 5.0 mm for drill bit 4.3 mm
- ✓ Tap for 5.0 mm locking head screws

- ✓ Torque limiting screwdriver – 3.5 mm tip (For 5.0 mm locking screws)

These implants and instruments are manufactured by Siora using medical-grade titanium and stainless steel as per ISO 13485:2016 standards. Their quality is tested under strict parameters by skilled quality assurance managers.

Locking large fragment implants provides stable fixation and allows the use of LCP plates. Besides this, the surgeon can also use both locking and cortical screws as per the requirement with these implants.

Siora Surgicals Pvt. Ltd. is an ISO 13485:2016 standard and Indian-FDA-approved manufacturer of an excellent range of orthopedic devices. Based in India, the company has experience of over 30 years and it serves numerous clients based in different countries. Siora also owns an advanced production unit based in the RAI district, Sonipat, Haryana. For contamination-free packaging of products, the company has established a cleanroom meeting ISO class 7 (10,000) guideline. Siora Surgicals is also looking for trustworthy [Orthopaedic Implants Distributors in Slovakia](#) to expand its network and mark a strong presence in the global market.
